

# Undergraduate Science and Engineering Scholarship

Spring 2010

Intermountain Section American Water Works Association

3430 East Danish Road

Sandy, UT 84093

Im.s.awwa.org

---

## Purpose

The undergraduate Water in Science and Engineering Scholarship was created by the intermountain section of the AWWA to encourage science education and training related to the field of water quality, supply, or treatment and to support an outstanding undergraduate student in that field.

## Eligibility

Students are eligible to apply who pursuing a water related science or engineering degree in the Intermountain West. Students who have been accepted into a program but have not yet begun coursework are eligible to apply. Applicants for this scholarship are considered without consideration of race, gender, color, or creed. Students are eligible to receive an AWWA scholarship once per degree program.

## Timeline

The application and all required supporting materials must be received by the Intermountain Section AWWA no later than November 2nd, 2009. The recipient will be notified and the award sum will be made available by December 1st, 2009.

## Support Provided

This scholarship will be awarded as a one-time grant in the amount of \$1,000.00. All applicants will receive a one year IMS AWWA student membership and a one year subscription to *Journal AWWA*.

## Application Requirements

Along with the attached application form, please send

- A complete resume
- An essay regarding your academic interests and career goals and how they are relevant to water quality, supply, or treatment in the Intermountain West. Essay should be no longer than 3 pages double spaced.
- Two letters of recommendation

## Selection Criteria

Members of the Student Outreach and Scholarship Committee of the Intermountain Section of the American Water Works Association will review all submitted application materials. Applications will be evaluated based on:

- The applicant's letters of recommendation
- The quality of the applicant's essay
- The applicant's potential to contribute to the field of water quality or water supply and treatment in the Intermountain West
